Os324plus NEW

ORDER CODE: OS324PLUS

The **OS324PLUS** is a quick-lock joining omega bracket featuring an elongated slot with an M12 mounting point, specifically developed as a dedicated accessory for the Astra Blade100IP.

Engineered to ensure maximum efficiency during truss mounting operations, the **OS324PLUS** is designed to seamlessly lock two fixtures together, creating a perfectly straight, continuous line. In addition to keeping the units rigidly aligned, the bracket provides a secure, central hanging point for both fixtures. Crucially, the elongated M12 slot allows for precise horizontal clamp adjustments, expanding configuration possibilities and ensuring perfect balance during professional rigging.

The integrated central mounting point offers superior structural strength, enabling its use even in demanding applications where mechanical resistance is a top priority. These features make the **OS324PLUS** the ideal solution for touring, fixed installations, and rental applications, environments where reliable alignment and setup speed are essential.

Thanks to the Quick-Lock system, joining and mounting multiple Astra Blade100IP units is exceptionally fast and intuitive, optimizing workflow and significantly reducing installation times.
