Poet F6X is a 6" (150 mm lens) LED Fresnel that pairs exceptional output and premium light quality with the full **Spektra OS** feature set, at a price that keeps it within reach.

The Poet F6X features a **250 W, 6-colour LED source** that delivers an impressive output of **9,200 lumens**.

The Poet F6X features an innovative hybrid motorised/manual zoom system, allowing operation both from the console and manually like a traditional Fresnel, with an internal zoom range of 10°-80°. Its optical design ensures precise focusing, crisp shadows, and excellent beam control, while the included 8-leaf barndoor enables clean cuts without chromatic aberration. An optional PC lens is available as an accessory, for a harder beam edge.

Spektra OS ensures consistent operation and outstanding colour performance, offering a wide and precise CCT range from ultra-warm to cool whites, high intensity, and a **CRI of up to 96.8 Ra**. It also includes multiple control modes, lamp and gel emulation, and ultra-smooth dimming.

Fixtures in the Poet series also provide enhanced connectivity, with onboard NFC and Bluetooth, optional CRMX, and a large display with an intuitive user interface for standalone operation.

The Poet F6X is built to go beyond everyday expectations, making it a true workhorse for theatre, TV, and trade show applications without exceeding the budget.
